- When using the oil for the first time, unscrew the cap and cut off the very end of the plastic tube with a pair of scissors.
- Remove the blade guard and switch the appliance on.
- Holding the clipper at a 45 degree angle, gently squeeze the oil tube and apply 2 drops directly onto the blades.
- Leave the unit on for a further few seconds to allow the oil to thoroughly spread along the length of the blades.
- Switch off the unit and remove any excess oil by gently dabbing with a cloth before using on hair.

Clipping

- Attach a comb guide as required - your clipper is supplied with 6 comb guides (grades 1, 2, 3, 4, 6, 8). Each comb guide is labelled.
- Switch the clipper on and the blades will start to move.
- Starting at the nape of the neck, hold the clipper with the teeth of the clipper pointing upwards, ensuring that the comb guide is resting flat against the head.

- Slowly move the clipper upwards and outwards through the hair towards your crown, against the direction of the hair growth. The comb guide will help to lift the hair while the blades cut the hair at the desired length.
- Once the desired length is achieved at the back of the hair, start clipping the top and sides.
- Hold the clipper to the front of your hair with the teeth pointing towards the back of your head and move the clipper towards your crown. Repeat if necessary, moving in rows from the front and the sides of your head to the back.
- You should achieve an even length cut all over your head.

For a shorter back and sides, with length on the top:

- Attach the longer comb guide as required for the top of your hair - your clipper is supplied with 6 comb guides (grades 1, 2, 3, 4, 6, 8). Each comb guide is labelled with grade number and length.
- Switch the clipper on and the blades will start to move.
- Hold the clipper to the front of your hair with the teeth pointing towards the back of your head and move the clipper towards your crown. Repeat as necessary, moving in rows from the front and the sides of your head to the back.
- If you wish to take the back and sides of your hair to a shorter length, switch off the appliance and attach a shorter comb guide.
- Starting at the nape of the neck, with the comb guide flat against the head, move the clipper upwards and outwards over the area you want to take shorter.
- Repeat on the sides of the hair, starting with the teeth of the clipper pointing upwards and comb guide flat against the area above the ear, again moving the clipper upwards and outwards.

Outlining:

- To tidy up the edges around your cut e.g. neckline and sideburns, detach the comb guides.
- Hold the appliance upside down, so the front of the clipper is facing towards your head.
